

Job Description - Radiographer

The Radiographer will be responsible for conducting handheld chest X-ray (HHX) screening during community outreach and TB-NCD screening camps across assigned districts. The role includes operating HHX equipment, ensuring high-quality imaging and radiation safety, supporting AI-enabled X-ray reporting, identifying and referring presumptive TB cases, and maintaining accurate digital records through Nikshay and other designated platforms. The Radiographer will coordinate with District Coordinators, NTEP teams, and frontline health workers to ensure smooth camp operations, manage HHX equipment safely, maintain screening and equipment records, submit timely reports, and support project documentation. The position requires technical expertise in radiography, proficiency in digital data entry, adherence to radiation safety protocols, and willingness to travel extensively across assigned districts.

Education Qualifications: B.Sc. Degree in Radiography or Radiology/ 2 Year full time Diploma in Radiology.

Experience: Minimum 2–4 years of experience in radiography services, preferably in public health or outreach settings. Experience in operating digital X-ray or handheld X-ray systems. Basic computer proficiency and ability to enter data using laptops and digital applications. Willingness for extensive field travel across assigned districts.

Salary Range: 25000-28000 PM + Shared cab for field Activities

Location: Panchkula, Yamunanagar, Ambala and Kurukshetra, Kaithal, Karnal, Jind, Panipat, and Rohtak, Sonipat and Jhajjar
